

ULTRA

paint protection film

available in clear high gloss and matte finish

Premium Protection Designed to Last

SunTek Paint Protection Film Ultra is scientifically formulated to help maintain the beauty and integrity of vehicle finishes for many years, in all kinds of weather. It's a combination of innovative film technologies that we stand behind with a 10-year limited warranty.

PPF Ultra comes in either optically clear high gloss or a matte finish that can be used to create specialty effects. Our top-performing film is applied to the surface of the vehicle to create a barrier against water, insects, road debris, and other stains. With either finish, there are benefits of self-healing film and our proprietary HydroResist™ technology.

Lasting Resistance

HydroResist™ top coat increases stain resistance and product longevity by limiting water and dirt accumulation on the film's surface.

Extra Endurance

Automotive finishes stay fresh and flawless longer with a film that helps offer the most power to shield against damage caused by rocks, salt, insects, and other road debris.

Self-Healing

Repairing minor scratches is almost effortless; film self-heals using heat from a vehicle's engine or the sun.

Good Looks

Paint Protection Film Ultra is available in high gloss and matte finishes. Outstanding optical clarity makes the film nearly impossible to detect once installed.

10 Year Limited Warranty

The manufacturer warrants professionally sold and applied SunTek® Paint Protection Film Ultra series against cracking, bubbling or yellowing for a period of ten years from the date of purchase of the Product. This 10-year limited warranty applies only to SunTek Paint Protection Film Ultra series. Other restrictions apply; contact a SunTek dealer or a customer service representative for details.
